

PREBLACK PE 702-50

1111

PREBLACK PE 702-50 is a polyethylene based black masterbatch. It has been developed for the colouring of PE-LD and PE-HD films, profiles, hollow articles and injection-moulded goods. PREBLACK PE 702-50 can also be used for polypropylene.

Appearance	Granule
Carrier	PE-LD
Pigmentation	General purpose carbon black (SRF-type), 50%
Density	1.2 g/cm ³
Light fastness	8, very good
Temperature stability	< 300 °C
Dosing	0.5 - 10 % depending on the desired blackness and UV-protection
Moisture content	Max. 0.15% when produced
Packaging	1250 kg in 25 kg PE valve bags on a one-way stretch wrapped pallet, or 1250 kg in octabins
Storage	Can be stored for one year in its original package. Packages should be stored indoors.

The information in this data sheet represents typical values obtained by us and should not be regarded as a specification.

We condition that the product will be inspected and qualified by the customer for his process to meet the specific requirements set by application, processing equipment and end product.
