

PREWHITE PP 51-50

0611

PREWHITE PP 51-50 is a polypropylene based white masterbatch developed for the colouring of PP cast and BOPP films plus extruded polypropylene sheets.

Due to very good homogeneity of PREWHITE PP 51-50, it is well suited for fast line speeds, thin layers and relatively high masterbatch dosages.

According to FDA and BgVV regulations PREWHITE PP 51-50 is approved for use in contact with foodstuffs without limitations.

Appearance	Granule
Carrier	PP homo polymer
Pigmentation	TiO ₂ (rutile), 50 %
Density	1.5 g/cm ³
Light fastness	8, very good
Temperature stability	< 260 °C
Dosing	1 - 10 % depending on desired opacity
Moisture content	Max. 0.15 % when produced
Packaging	1250 kg in 25 kg PE valve bags on a one-way stretch wrapped pallet, or 1250 kg in octabins
Storage	Can be stored for one year in its original package. Packages should be stored indoors.

The information in this data sheet represents typical values obtained by us and should not be regarded as a specification.

We condition that the product will be inspected and qualified by the customer for his process to meet the specific requirements set by application, processing equipment and end product.
